

LEADS

Flat Leads

Flat lead is perfectly suitable for fishing in areas with muddy bottom or with heavy current. Its shape allows the lead to lay flat on the lake bed. Our flat lead is offered in two versions: *w/ swivel* (to be used with all rigs using the safety bolt clip); *in-line* (to be used with running rigs, or bolt rigs “fixed” when rolling swivel size: 8 is pushed onto the lead).

Flat Bomb w/ Swivel In-Line Flat Lead

Riser Leads

Riser is a specialty lead design for fishing in areas with lots of underwater snags and stones. Its slim shape allows for a long distance casts. Our riser lead is offered in two versions: *w/ swivel* (to be used with all rigs using the safety bolt clip); *in-line* (to be used with running rigs, or fixed rigs “bolt” when used with rolling swivel size: 8 pushed onto the lead).

In-Line Riser Lead

Riser Lead w/ Swivel

Leads
