

## Quality Telescopic Landing Nets

### A lifetime purchase!

The new, high-class landing nets have a molded aluminum articulated joint that is unmatched in terms of stability. The landing net pole and hoop are made of extruded aluminum, making them wonderfully light and robust. Hoop and pole are coated with a special alloy applied under high pressure. This allow not only looks elegant, it also contributes up to 15 % greater stability. Furthermore, it is completely resistant to scratches. All landing nets are equipped with smell-repellent honeycomb weave netting.

Precise folding mechanism made from aluminum.

New: with belt clip
